Hello Anna,

I have verified with the BI Team that we have a report that works based on current ask.

It has not been automated yet but is manually run. If this currently satisfies the ask it can be scheduled.

-Glenn

Glenn & Liz

Please review and let Cam know what is in the realm of the possible this morning.

Thanks.

Anna

Hi Anna / Glenn / Liz,

Circulating the information that is being provide to Command/ Communications twice daily (10AM/4PM) at the bottom of this email.

Right now, Analysts are reading all calls, performing QA, adding #Convoy where appropriate, and summarizing the data you provide.

Question: Could this be automated / integrated into very simple mobile dashboard within a short period?

I only ask for a short timeline because we don't know how long this will last and need to make sure the effort can be realized – 24 to 36 hours. Please let us know what is feasible. And, I realize this may not be possible due to number of limitations.

Below are the basic requirements and an example.

- Indicators
 - o Total calls #Convoy
 - o Tickets Sector 23 | 24
 - o Criminal Offences #Convoy
 - o Persons Charged
 - o Persons Arrested
 - o Hate incidents
- Time dimension:
 - o Today
 - o Yesterday

o Cumulative (Since January 28th)

- We can add detail on types (top 5) of calls, tickets, and offences as a second requirement.

Example:

		
Total	Today	Yesterday
650 Total Calls		
150 Total Tickets		
100 Criminal Offences		
15 Persons Charged		
25 Persons Arrested		
12 Hate Incidents		

Updated numbers as of noon today.

Police have received about [40] calls as of noon, bringing the total to nearly 700 since the demonstration began.

- - By-law concerns (Fireworks; Noise)
- - Abandon vehicle
- - Vehicle towed for obstruction
- The total number of active criminal investigations to date is [61] – they remain mostly mischief / threats.

- Approximately [20] tickets issued as of noon this morning,
- Excessive noise, red light, and other HTA offences.
